

Global Cellular Subscription

Mobile phone subscriptions per 100 people. This number can get over 100 when the average person has more than one subscription to a mobile

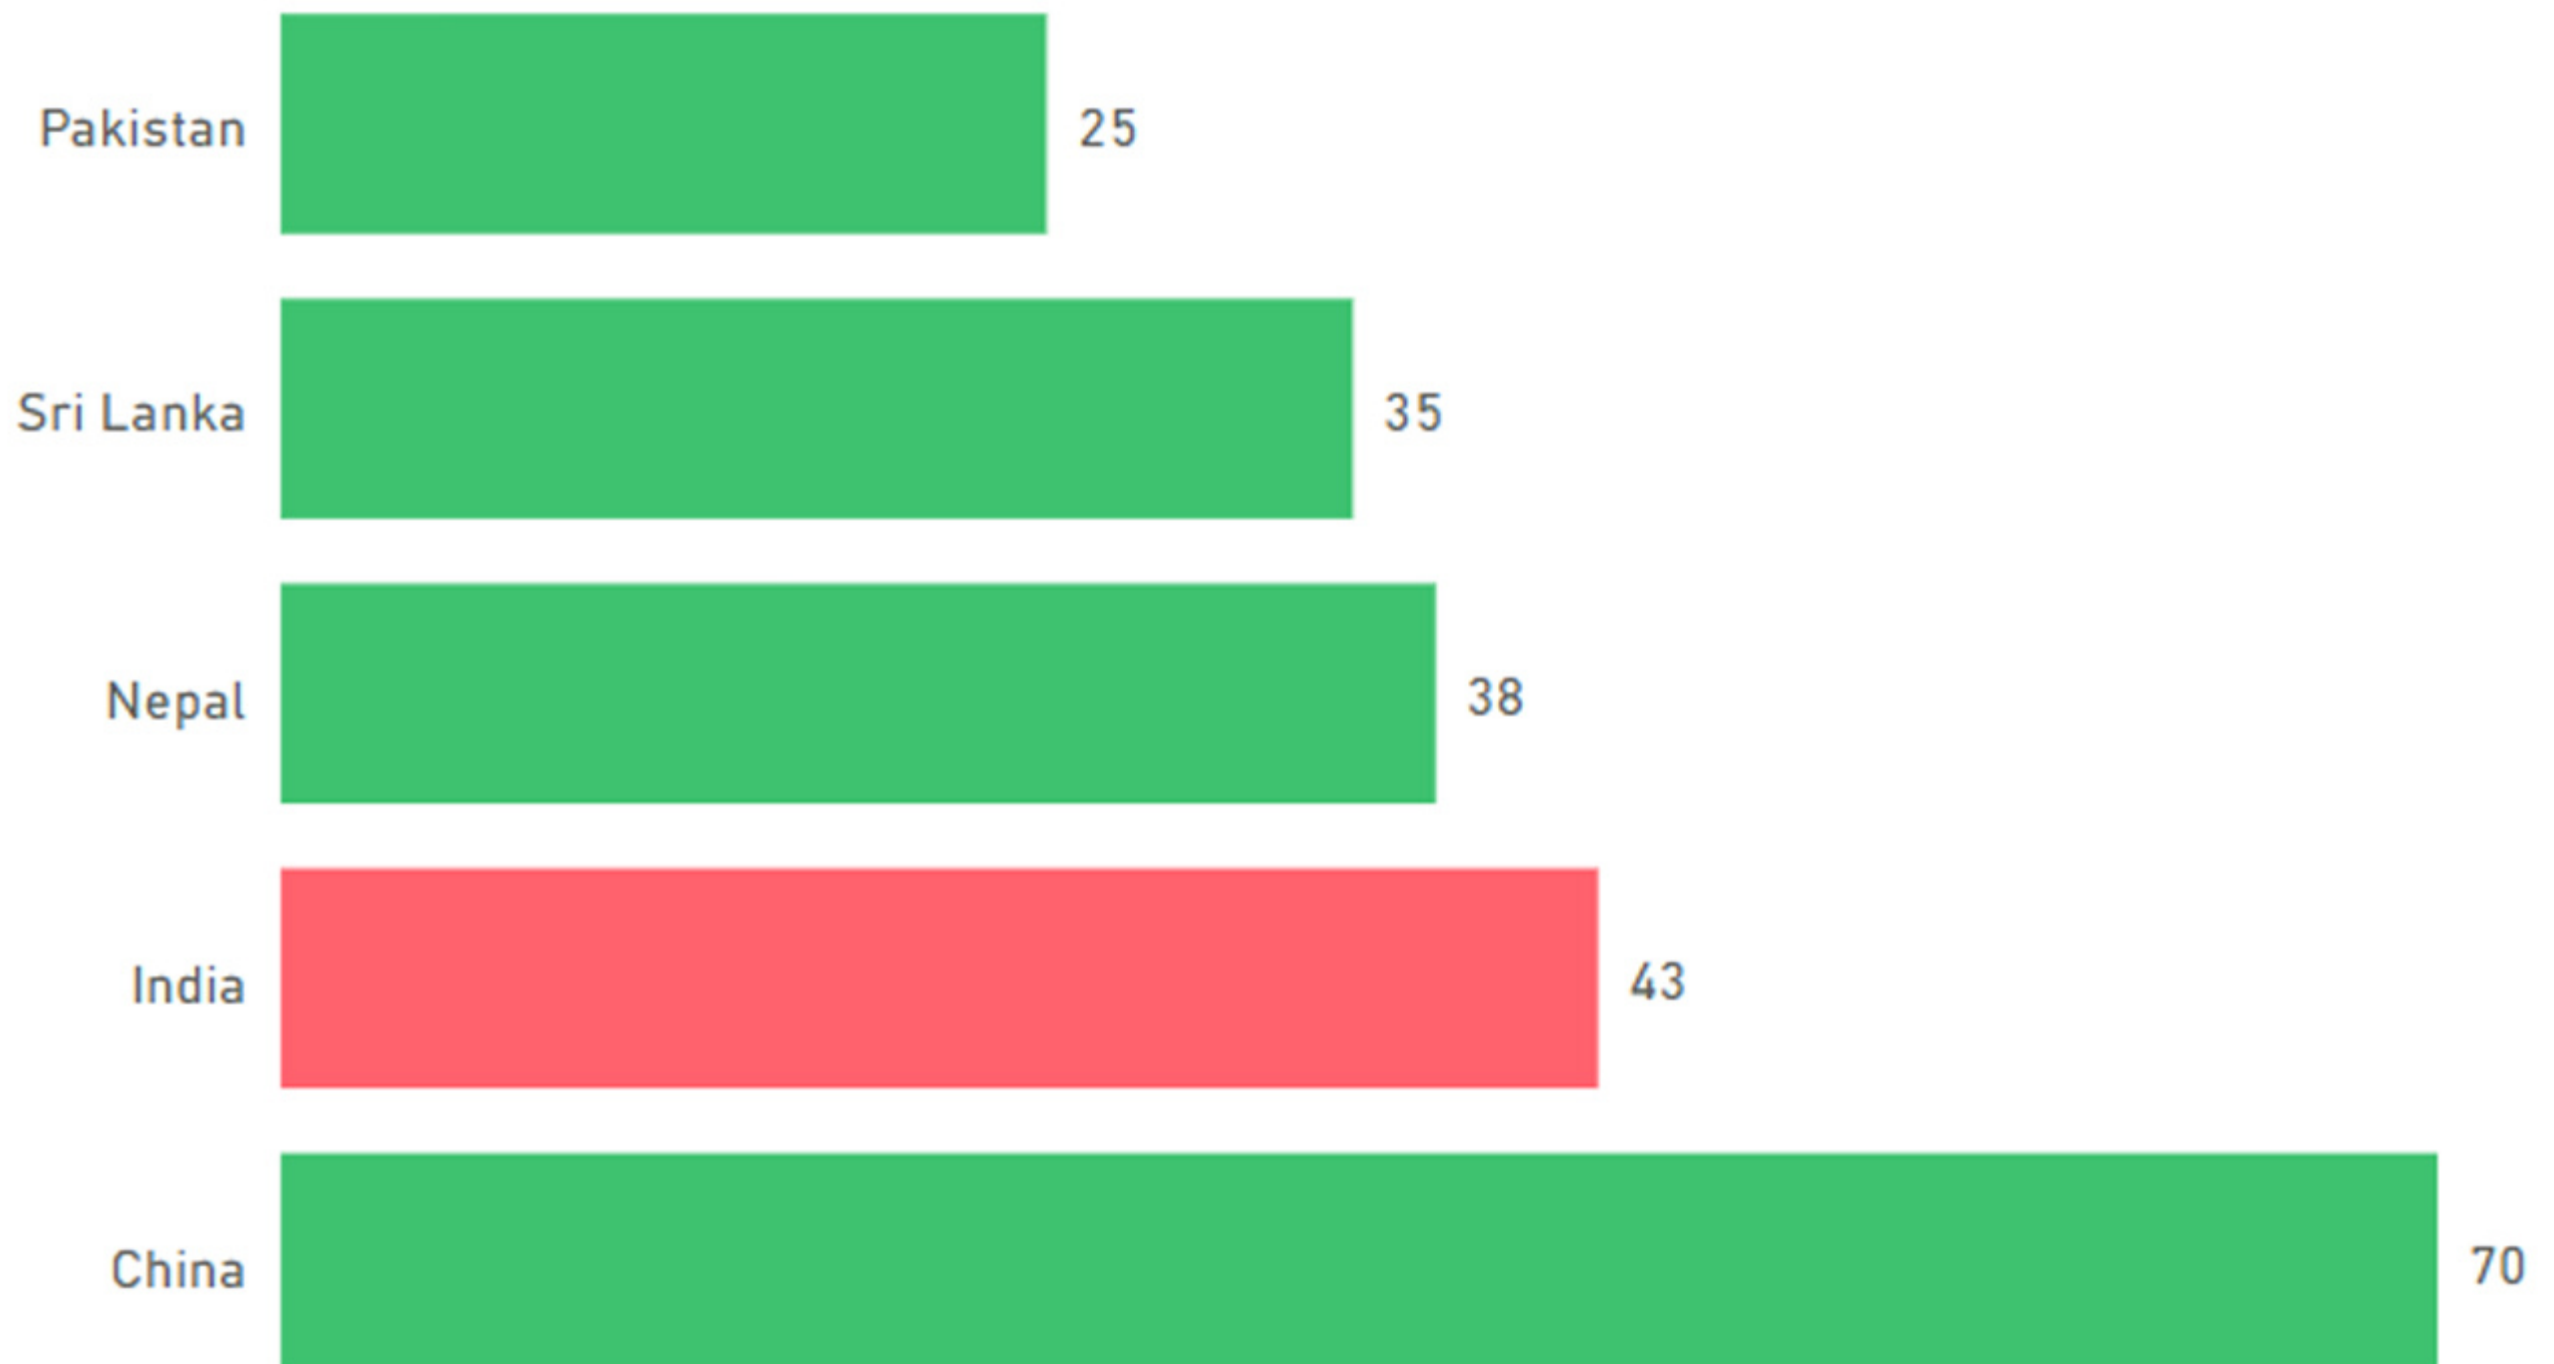

Based on 2020 global data

Compared to our neighbors, India lags behind in the number of cellular subscriptions. However, having more cellular subscriptions is not always a good indicator of development or progress.

Global Internet Subscription

The share of the population that is accessing the internet for all countries of the world.

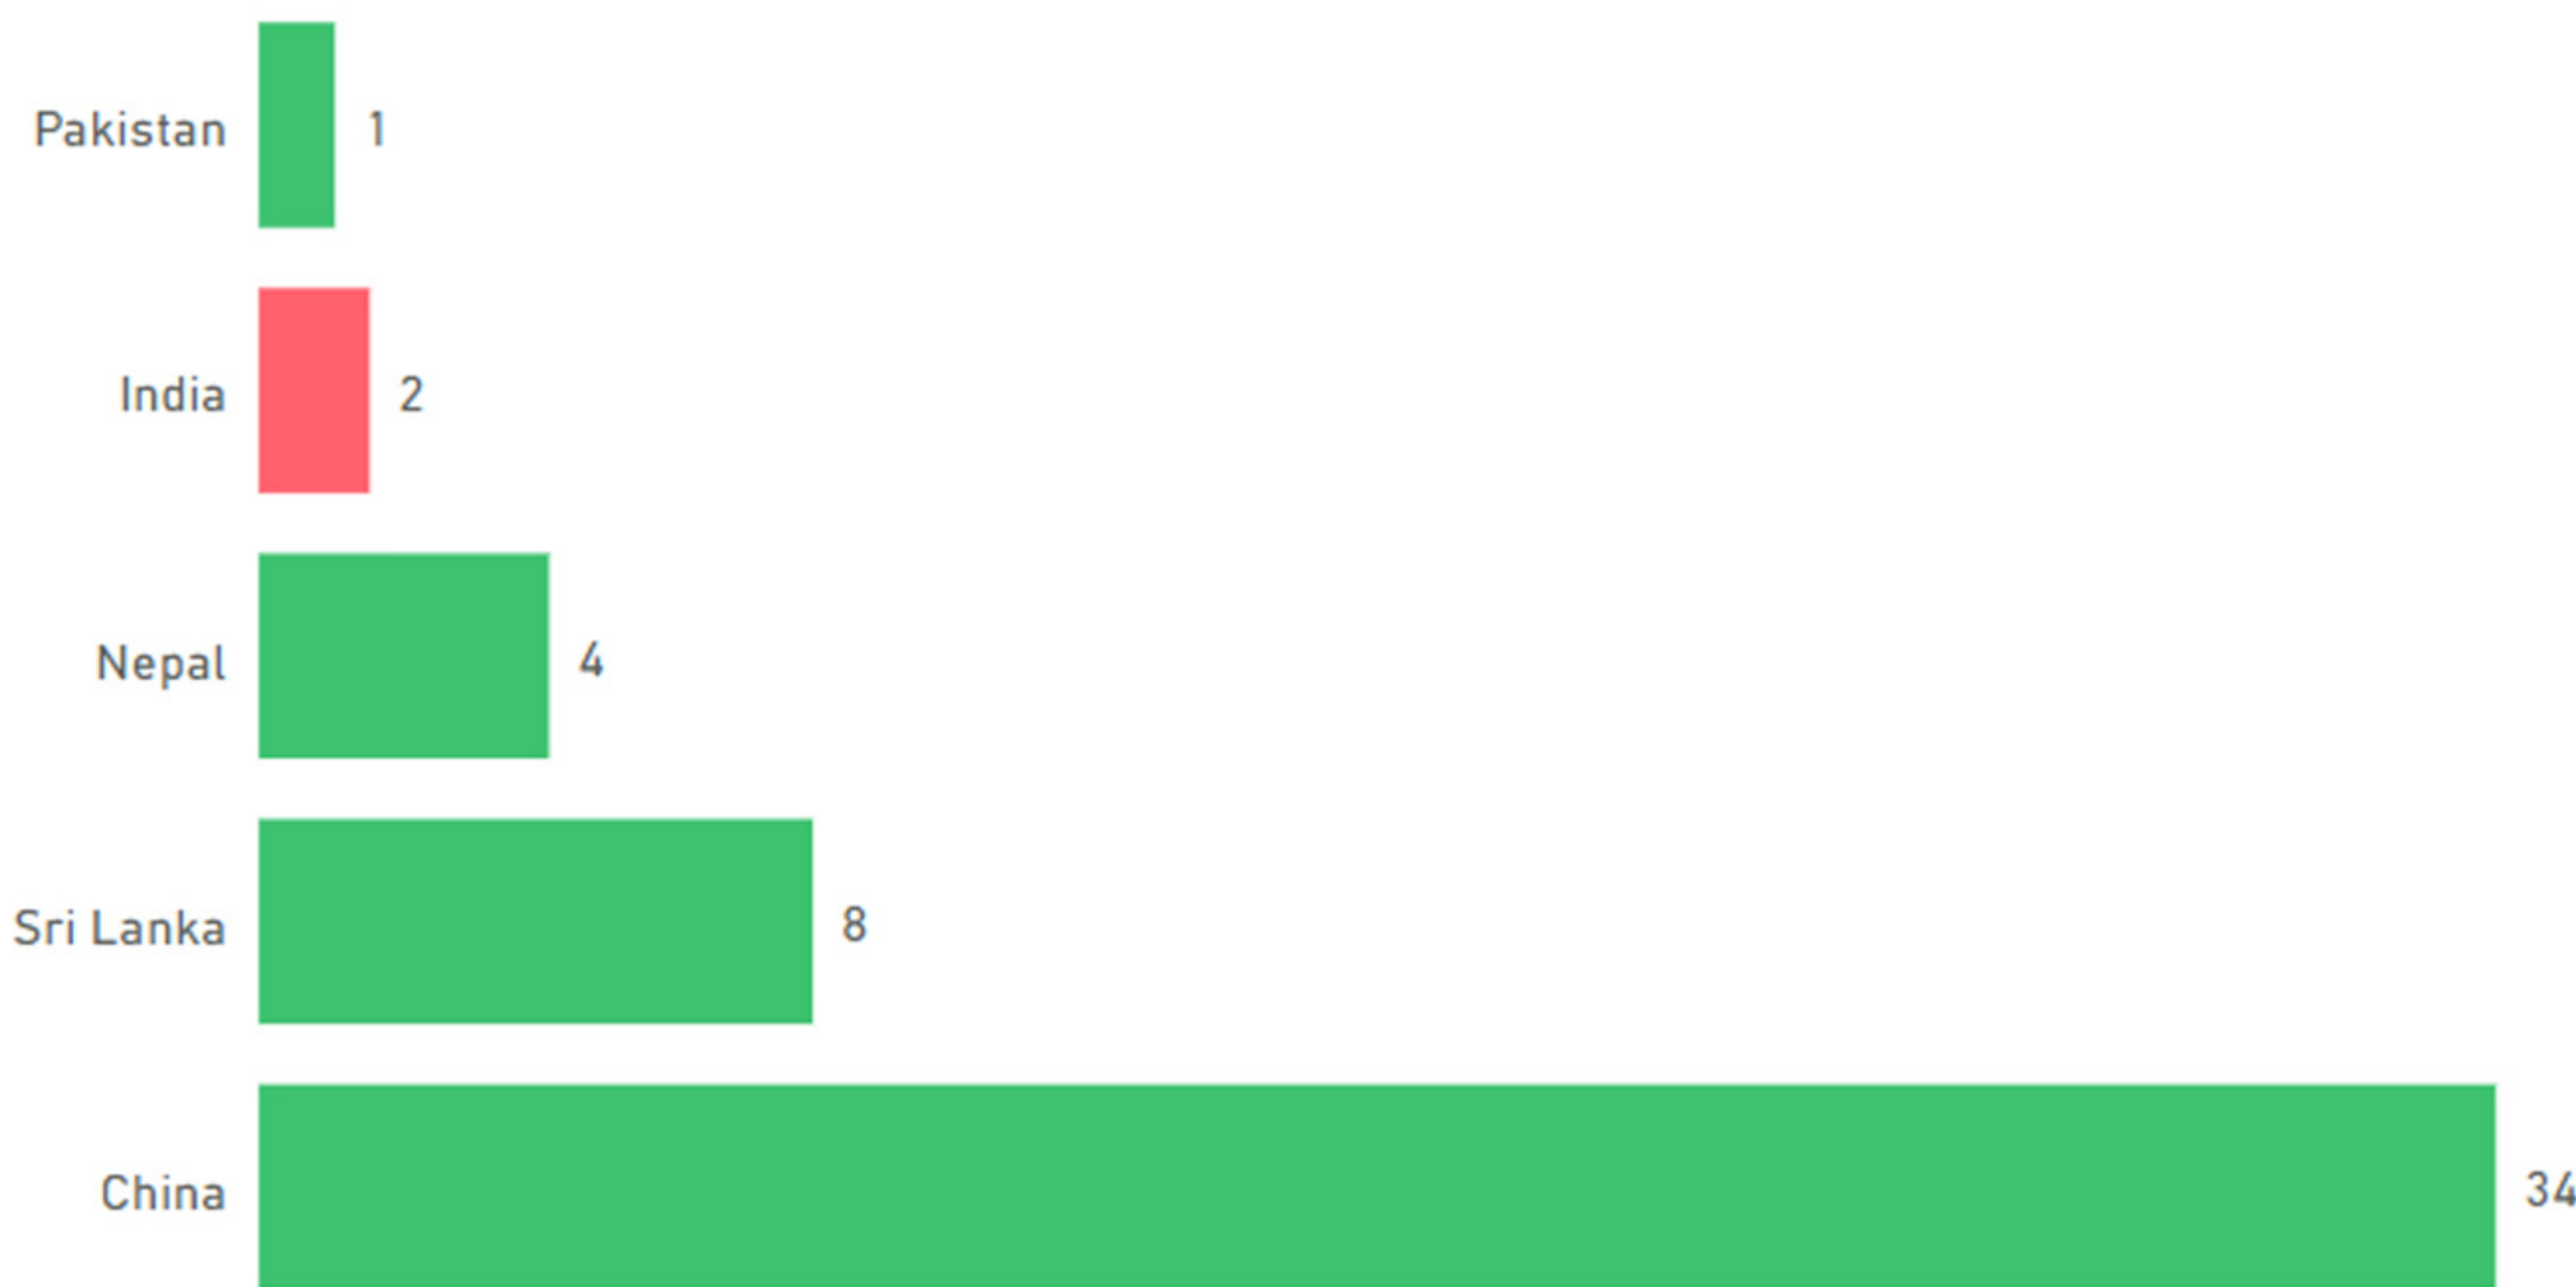

Based on 2020 global data

Compared to our neighbors, India lags behind in the number of cellular subscriptions. However, India has a larger number of people online compared to our neighbors, with China at the top.

Global Broadband Subscription

The number of fixed broadband subscriptions per 100 people. This refers to fixed subscriptions to high-speed access to the public Internet at speeds equal to, or greater than, 256 kbit/s.

Based on 2020 global data

India and Pakistan have the least number of people with broadband connections. China tops the list with 34 out of every 100 people having a broadband connection.
